Continuous improvement

For more than 50 years, we've been combining design innovation with the highest-quality manufacturing. Amtico Signature continues to push the boundaries, to help you achieve original.

BRITISH EXCELLENCE

We're not just made in Britain, we're designed, innovated, and manufactured here. From our proud heritage comes an agile service and sustainable supply chain.

Why choose Amtico Signature?

Three reasons why Amtico is the ultimate creative partner.

1 UK manufacturing excellence

Every Amtico Signature floor is made to order by our expert teams in Coventry, UK. We continually invest in new technology so our floors remain of the highest quality, and we can introduce more intricate and detailed laying patterns. We also invest in our workforce, upskilling our specialists to international standards and developing new apprenticeship schemes.

2 British design innovation

Because our in-house design team constantly analyse commercial design trends and specifier feedback, they can develop useable flooring designs that will ignite your imagination and meet the ever-shifting challenges of your sector.

3 Experienced service and support

At every stage of our collaboration, we speak your language. From product selection to on-site installation and maintenance advice, a dedicated specialist with experience in your sector will make sure your project runs smoothly.

Making an impact, just not on the environment

We've built our name pioneering innovative manufacturing and design solutions for modern living, and a sustainable business practice underpins that. As industry leaders, it's natural we would set the standard for continuous product efficiency, waste reduction and material innovation.

You can see how we're revolutionising our working practices and challenging the industry norm at:

amtico.com/commercial/sustainability

Product Innovations

Embrace perfect imperfections

Our Treated Grains celebrate the unique qualities of timber through the process of hand working colour and texture into the grain, resulting in a range of colourful tones and contemporary wood finishes.

Products range from monochromatic, weathered pines, to colour stained and revived timber, with variations designed to be mixed and contrasted. A brand new ceramic-wood hybrid also features Trace – which translates beautifully into either a tile or a plank format.

See page 32 for the full Treated Grains palette.

- 1. Solar Pine
- 2. Rotterdam Oak
- 3. Dockland Oak
- 4. Trace Raku

Discover unrefined beauty

Rustic Grains' honest features and pronounced textures evoke the tactile nature of salvaged, reclaimed woods.

From the defined brushy grain of time-worn timber to the man-made marks of cross-sawn wood, Rustic Grains bring a sense of movement and authenticity, with hand-worked designs crafted to achieve luxurious simplicity.

Featuring the brand new Rustic Wood emboss, the impact of these palettes comes from the seemingly endless natural grain variations, and a raw organic weightiness.

We've added the new Rustic Grains to our existing Wood palettes. Look out for the products marked with a * or see them all together in the new Signature Additions folder.

See colour differently

Amtico's in-house designers have poured all of their knowledge and skill into creating and designing these 25 products which will change the way you see, experience and ultimately use colour.

Colour Edit's broad spectrum of tones perform beautifully as part of a pattern, as subtle accents or flooded across a floor. Four different designs add depth and variety to the colourways, from aged plaster and subtle watercolours, to more architectural tonal shades.

The carefully curated interaction between the infinite colour and texture combinations will redefine your vision of colour.

See pages 46-53 for the four Colour Edit palettes.

INSPIRING
POSSIBILITY

An extraordinary range of products, palettes and patterns that give you the design choices to realise your creative vision.

Channel a future classic

Tempus is a hybrid design that explores the creative space between ceramic and stone.

Its six colourways are inspired by the beautiful flaws of stone – capturing the essence of time passing through earth's organic processes.

Cool, calm, almost soothing, Tempus is a new architectural material and a perfect choice for clean, simple interiors.

See page 44 for the Tempus palette.

Products

Begin

Three ways to achieve original.

Begin with Product

The Signature palettes begin on page 20

Discover the unlimited possibilities in Signature's extensive palettes. Let the variety of tones and textures inspire your scheme.

Begin with Pattern

For laying pattern inspiration start at page 70

Explore our ever-evolving range of unique laying patterns. Personalise them with your own product combinations. Or choose from more than 100 predefined floors, crafted by Amtico's in-house design teams.

Begin with Your Imagination

Learn more about bespoke design from page 222

Create completely bespoke flooring in collaboration with our passionate experts. Drawing on over 50 years of manufacturing expertise, Amtico has the technical ability to follow wherever your imagination leads.

Begin with Product

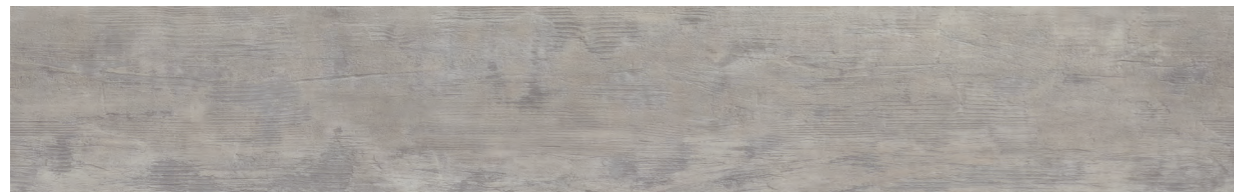

Explore Amtico Signature's 23 original palettes. Let your imagination be fired by our natural feeling woods, stones and abstracts. And then allow the colours, textures and finishes to guide you to the perfect floor.

BEGIN WITH PRODUCT

Choose any of our Signature planks and tiles in a single colour and size to create a floor with simple elegance. Or design your own combinations of colours and sizes to make something that will deliver real impact.

EP272 French Weave – Galleon Oak

French Weave

Number of sizes available

1

From a foundation of parquetry, we've adapted classic wood floor geometry for modern day use. Both elegant and robust, French Weave is a crafted, woven pattern with the strength and balance for large spaces.

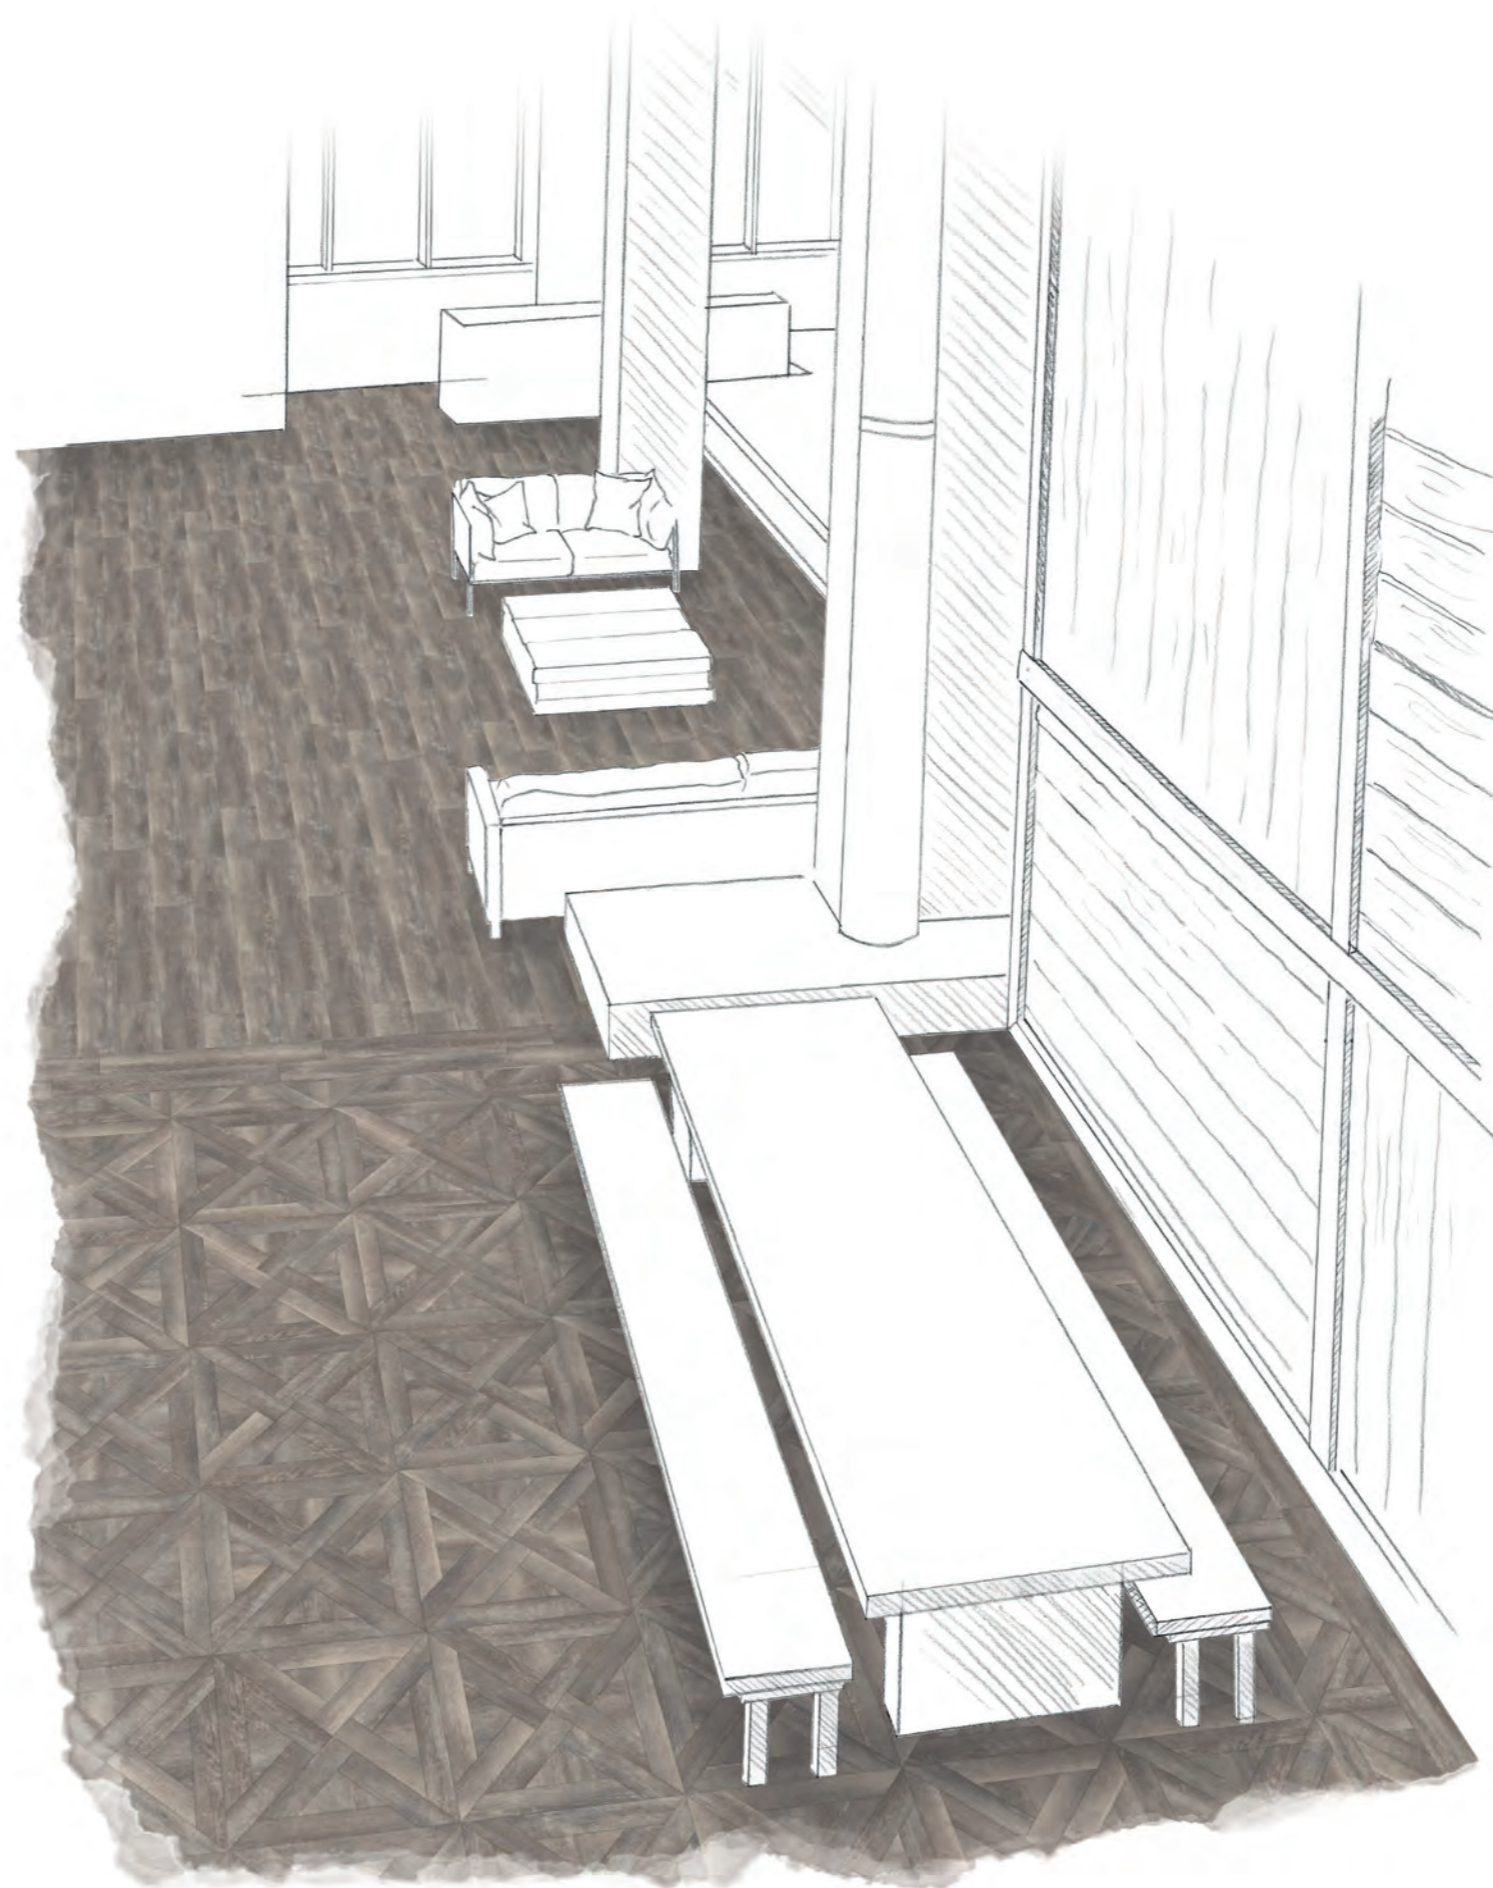

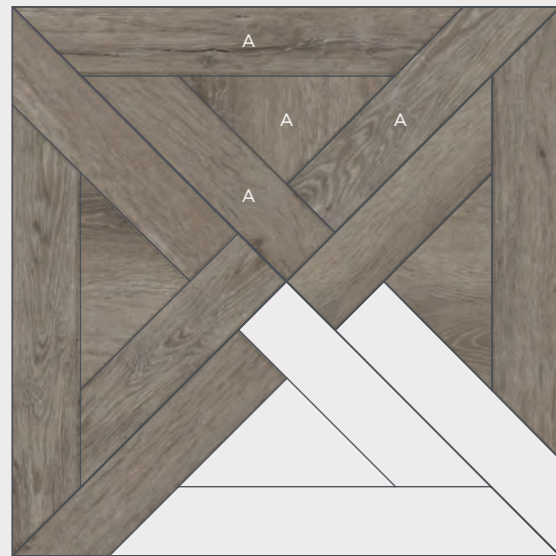

French Weave

French Weave works particularly well in characterful wood grains. The strength and symmetry of the individual squares leads the eye to a secondary pattern which expands into larger spaces. French Weave also makes an off-beat choice for cosy bars when paired with a dark rustic wood.

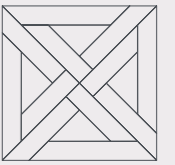

Create your perfect French Weave with Signature product combinations and arrange them using the wireframe below.

DC403 Scope – Encaustic Umber, Modernist Frame, Encaustic Mineral, Stucco Putty & Tempus Echo Stripping

Frame

Number of sizes available

2

Modern and architectural, Frame is a contemporary take on a familiar flagstone. This balanced mid-scale pattern offers new opportunities for designing big spaces.

Frame

With echoes of Mondrian, Frame is influenced by the trend for blocks and grids in modern architecture and interiors. Use for zoning large open spaces where the floor needs to remain the focus.

Stripping is essential to the pattern's geometry, giving a defining grid effect or a more natural grout-like finish, depending on the product selected.

Create your perfect Frame pattern with Signature product combinations and arrange them using the wireframes below.

2

Unashamedly influenced by Victorian style, Key Stone is an iconic pattern that delivers timeless elegance and classic geometry.

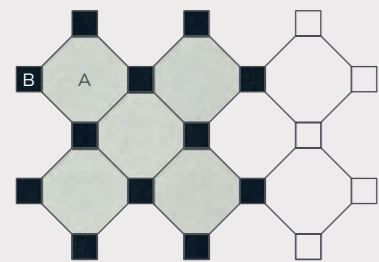

Key Stone

The beauty of Key Stone is its versatility. Key Stone Mini's proportions make a bold graphic statement, whereas Key Stone Small achieves a more classic Victorian look. Choose elegant stone product combinations for grand lobbies and dining rooms or pick a complementary palette for modern living and retail spaces.

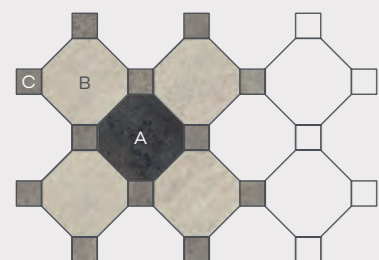

Explore our Signature product range and try different combinations in the Key Stone wireframes below.

“For the project, we were looking for a characteristic and high-quality floor, which can withstand a high volume of customers. With Amtico’s product variety, we had countless opportunities to create a tailor-made concept and conjure up exciting contrasts.”

Nina Heisler

Deko Design GmbH & Co. KG

Modern furniture and extraordinary flooring from Amtico create an atmosphere that invites customers to linger in this stylish eatery. A natural light wood finish of the elegant Basket Weave in one area contrasts with an imaginative and modern five colour pleat in another.

To highlight the seating areas, Deko Design chose the bold geometry of Key Stone Mini. Using the Endless Possibilities option, architects were able to select their own combination of colours that not only created a convincing finish but also a practical one. In an environment which combines high traffic and food service, durability and hygienic performance are as important as style.

Bespoke – Small Parquet –
Cornish Oak, Shore Oak
& White Wash Wood

“It was great to work on a project with such a great design concept that really worked well in the space.”

Nathan Lawrence
King Commercial Floor Coverings

When your office is a 46-storey glass tower overlooking Sydney Harbour and Opera House, you need an interior that’s every bit as spectacular.

Amtico Signature Parquet was used as a basis for the bespoke floor, with areas of Cornish Oak, Shore Oak and White Wash Wood flowing into each other in different areas of the office.

Cornish Oak perfectly offsets the cool marble surfaces in the kitchen, while the White Wash Wood walkways help identify zones, and promote a sense of space. The calming grey tones of Shore Oak create a base for the meeting spaces.

 Napoli, Dublin & Paris

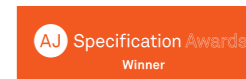

"It was not only simple to install, it was also easy to minimise waste. We have used Amtico on major projects many times before, and will most definitely specify the Signature collection again."

Ian Whalley
 Farrell & Clark Architects

When the School of Design at the University of Leeds set about refurbishing its Clothworkers' South Building, it chose the Amtico Signature collection – the vibrant colours and laying patterns proved the ideal way to refresh the building's entrance and stairwell. The versatility of the Signature Collection, with its vivid hues and distinctive abstract designs – such as smoky-effect Umbra Eclipse, and luxuriously dark Back to Black Vamp immediately appealed. As the location was such a high-traffic area, the durability of the Amtico product was also a significant factor and made it a logical choice for the project.

Collections: Amtico Signature
Products & Laying Patterns:
EP107 Large Parquet – Ink Wash Wood & Nomad Oak
Bespoke Basket Weave – Ink Wash Wood, American Oak & Seoul

“We loved the colouring of the Ink Wash which complemented the red brick structure of the existing building, while giving it a modern, up to date twist. Aesthetic elegance, combined with the hard-wearing longevity of a 1 mm LVT, was ideal for a heavy-traffic environment.”

Rachel Withey
Associate Director, 74 Architects

The repurposed 453 m² building, Hox Haus, now serves as the central focus, clubhouse and social amenity for the Hox Park student campus for students attending Royal Holloway, University of London.

Amtico Signature Ink Wash Wood was used throughout the Clubhouse, linking the finishes between the first and ground floors, including the internal stair treads. In order to create zones within the space, Designers' Choice Basket Weave was laid in bespoke colours, in order to provide the grounding for the pool and foosball table in the games area on the upper floor. The lighter, natural grain contrasts of Eden Oak complement the Ink Wash Wood in the quiet study area, located in the first floor Gatehouse extension.

LVT

flooring for high-traffic performance, durability and easy maintenance.

beautifully contrasting wood grains created a dynamic look.

BESPOKE

Begin with your imagination

Bold, creative and beautiful – a bespoke floor is the ultimate design statement. Thanks to our advanced manufacturing capabilities, our R&D and Design teams can work from a simple sketch or even a sample material or colour swatch to transform your unique vision into reality.

How we turn your ideas into reality

We understand design briefs don't always come fully formed. They can be more about a spark of an idea than hard lines and exact plans. So whether you are looking for a unique product or a completely bespoke floor design, bring us your creative inspiration and we will work with you to achieve your vision.

EXPERT KNOWLEDGE

The unrivalled knowledge, expert support and bespoke service you'd expect from a market leader with over 50 years experience.

Our CAD Team

Amtico's highly-skilled CAD team turn your product selection and layout into something our design and manufacturing experts can make a reality. Designs change and grow as we work with them, so the drawing approval process is collaborative, expertly managed through your Amtico Commercial Project Specialist, ensuring that the final floor meets your unique design vision.

Cutting

Amtico is renowned for its advanced finishing techniques. Over 50 years of manufacturing expertise means we can add the fine detail to your big ideas, creating bespoke shapes and products that no-one else can.

Installation

Our quality team test lays every bespoke design floor in our UK factory before shipping, to check for accuracy. This crucial part of the process means you can rely on Amtico flooring to fit first time and meet your project deadlines, even with the most intricate design.

[amtico.com/commercial/bespoke](https://www.amtico.com/commercial/bespoke)

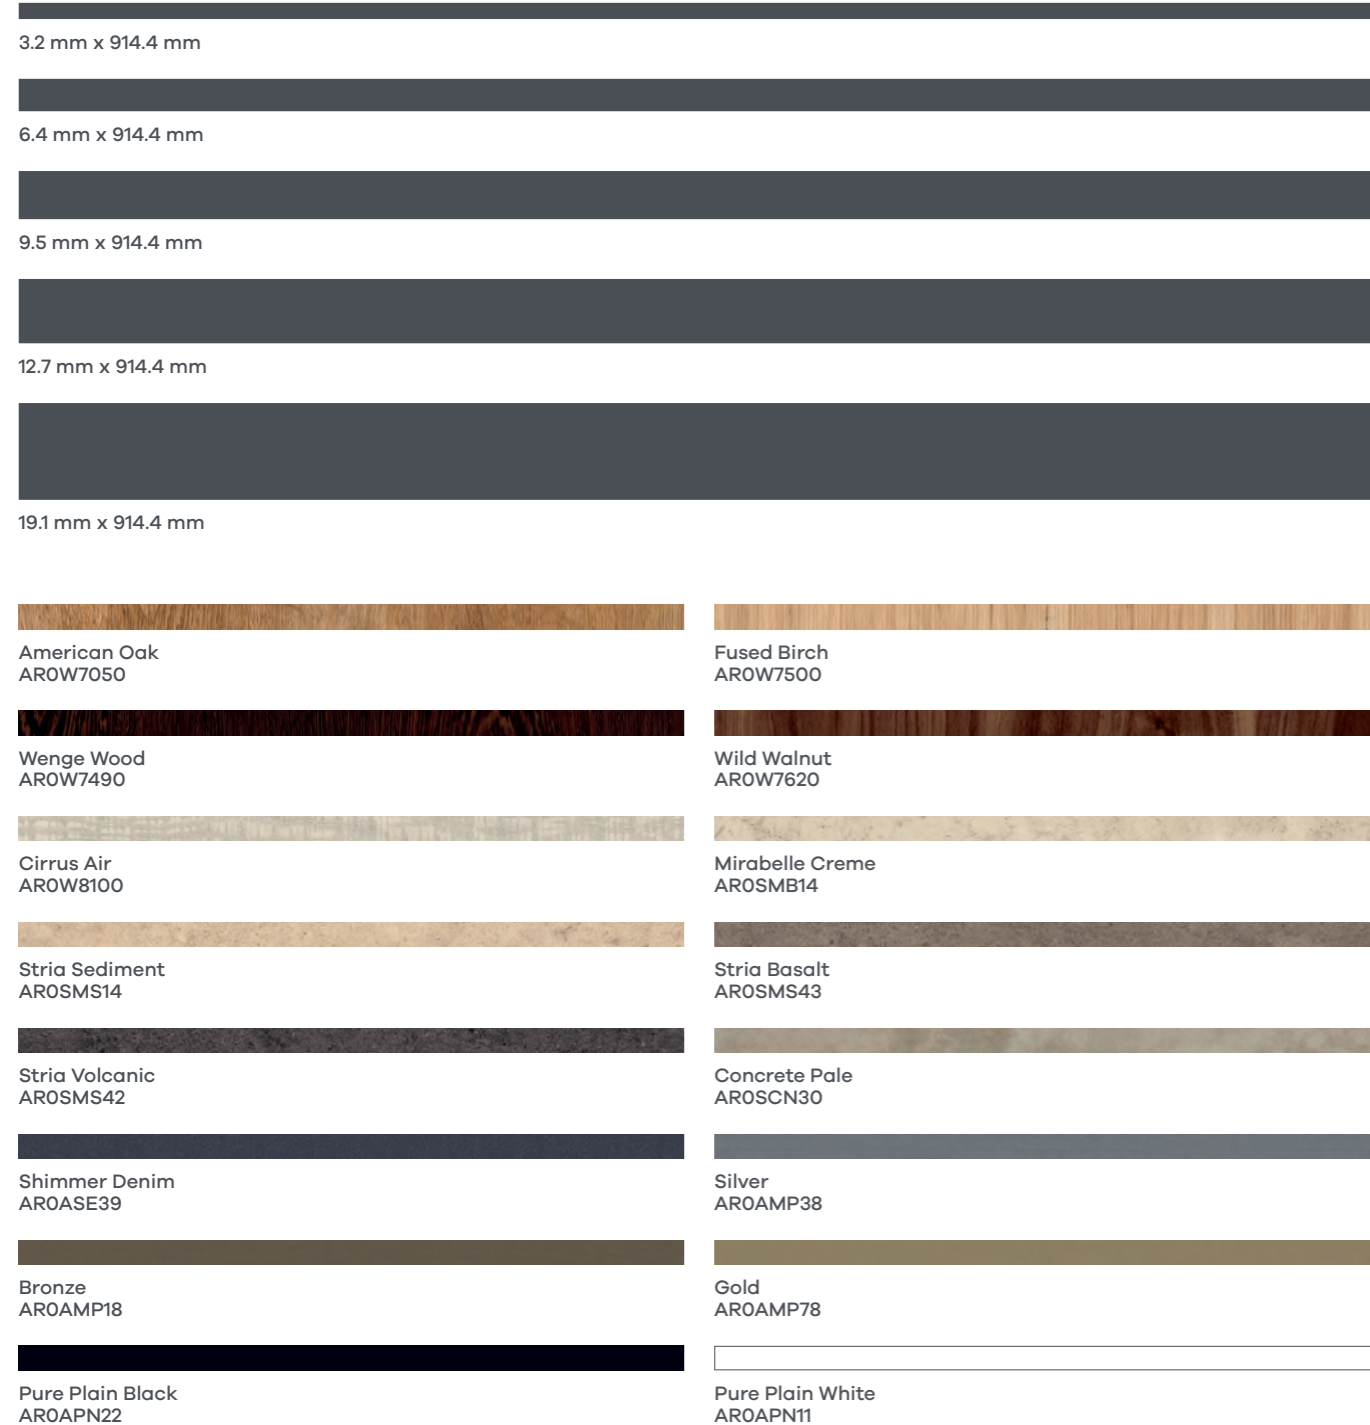

Minimum orders apply for bespoke floors. Please speak to your local Amtico representative.

Stripping

Add contrast, create a grout effect or define tile and plank shapes with Amtico feature stripping. Available in a choice of five sizes.

Feature stripping is available in the following sizes, 2 mm thickness*

This is a small representation of available feature stripping, for full stripping availability please visit amtico.com/commercial/stripping

*Sizes shown are not actual size.

Stripping Specification

Select from 16 readily available 3.2 mm x 914.4 mm stripping products, designed to complement your flooring and enhance your design.

Use the chart below to calculate the number of boxes of stripping you need based on the size of plank/tile (horizontal axis) and the quantity m² (vertical axis).

Quantity m ²	Size of plank/tile										
	152.4 x 457.2 mm	76.2 x 914.4 mm	114.3 x 914.4 mm	152.4 x 914.4 mm	184.2 x 1219.2 mm	228.6 x 1219.2 mm	304.8 x 304.8 mm	304.8 x 457.2 mm	457.2 x 457.2 mm	304.8 x 609.6 mm	457.2 x 914.4 mm
2.5	1	1	1	1	1	1	1	1	1	1	1

amtico signature 36+

Safety flooring with design sophistication

UK manufactured with the same extraordinary design philosophy that defines Amtico Signature, Signature 36+ delivers sustainable slip resistance and meets the requirements of the enhanced slip standard, but with the enhanced design possibilities of LVT planks and tiles.

Speak to your local Amtico Representative for more info.

Please note that the surface texture on Signature 36+ products differs from standard Signature products due to the inclusion of slip-resistant particles.

amtico.com

Amtico Acoustic

Amtico Acoustic enhances the acoustic properties of LVT by reducing impact sound transmission by up to 18 dB and also provides an extra level of comfort underfoot. Amtico Acoustic brings another layer of performance and versatility to the design quality and durability you expect from Amtico.

ACOUSTIC

Acoustic Key Attributes

SOUND REDUCTION

The closed cell 1 mm foam layer reduces impact sound transmission by up to 18 dB.

LOW FATIGUE

The closed cell foam structure can help increase comfort and reduce fatigue in high-traffic areas.

Lock Oak Acoustic – Stripwood

Technical Specification

Manufacturing Standard	EN ISO 10582 (EN 649)		Pass
Total Thickness	EN ISO 24346 (EN 428)		2.5 mm
Wear Layer Thickness	EN ISO 24340 (EN 429)		1.0 mm
Weight	EN ISO 23997 (EN 430)		3130 g/m ²
Abrasion Resistance	EN ISO 10582 (EN 649)		Type 1 Group T
Residual Indentation	EN ISO 24343-1 (EN 433)		≤ 0.1 mm
Dimensional Stability	EN ISO 23999 (EN 434)		≤ 0.25 %
Dimensional Stability / Curling	EN ISO 23999 (EN 434)		≤ 2 mm
Flexibility	EN ISO 24344 method A (EN 435)		Pass
Slip Resistance	DIN 51130 EN 13893		R10* Class DS
Chemical Resistance	EN ISO 26987 (EN 423)		Excellent
Light Stability	EN ISO 105-B02		≥ 6
Flammability / Smoke Emissions	EN 13501-1		B _{fl} -s1
Castor Chair Resistance (Type W)	EN ISO 4918 (EN 425)		Pass
Impact Sound Reduction	EN ISO 717-2		6 dB **
Thermal Resistance	EN 12664		0.021 m ² K/W (underfloor heating suitable)
Electrostatic Performance	EN 1815		≤ 2 kV
Emissions	Indoor Air Comfort Gold		IACG-352-01-01-2018
Emissions COV		Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).	A+
Environment	M1		Certified www.m1.rts.fi
UPEC	U ₄ P ₃ E ₂ C ₂	Revêtements de sol résilients 326-0031 evaluation.cstb.fr	Certificate UPEC 326-001.1
Environmental Product Declaration	EN 15804 Type III		BREG EN EPD No. 000183
Phthalate Free		Amtico Signature products are manufactured using both phthalate-free and bio-based plasticisers except for recycled content.	Yes
Surface Treatment			Quantum Guard Elite

* For safety flooring with long-term retention of slip resistance refer to the Signature 36+ range.

** For up to 18 dB sound reduction please refer to the Amtico Acoustic range.

Multiple Performance System

Flooring made to order with endless pattern possibilities

Total thickness of product: 2.5 mm

A. Quantum Guard Elite

Amtico's urethane formula provides superior durability and resistance against abrasions and stains. The reinforced low-gloss finish is highly realistic.

B. Superior 1 mm wear layer

Toughened upper layer, giving excellent impact resistance and high clarity, allowing the product designs to shine through.

C. Design layers

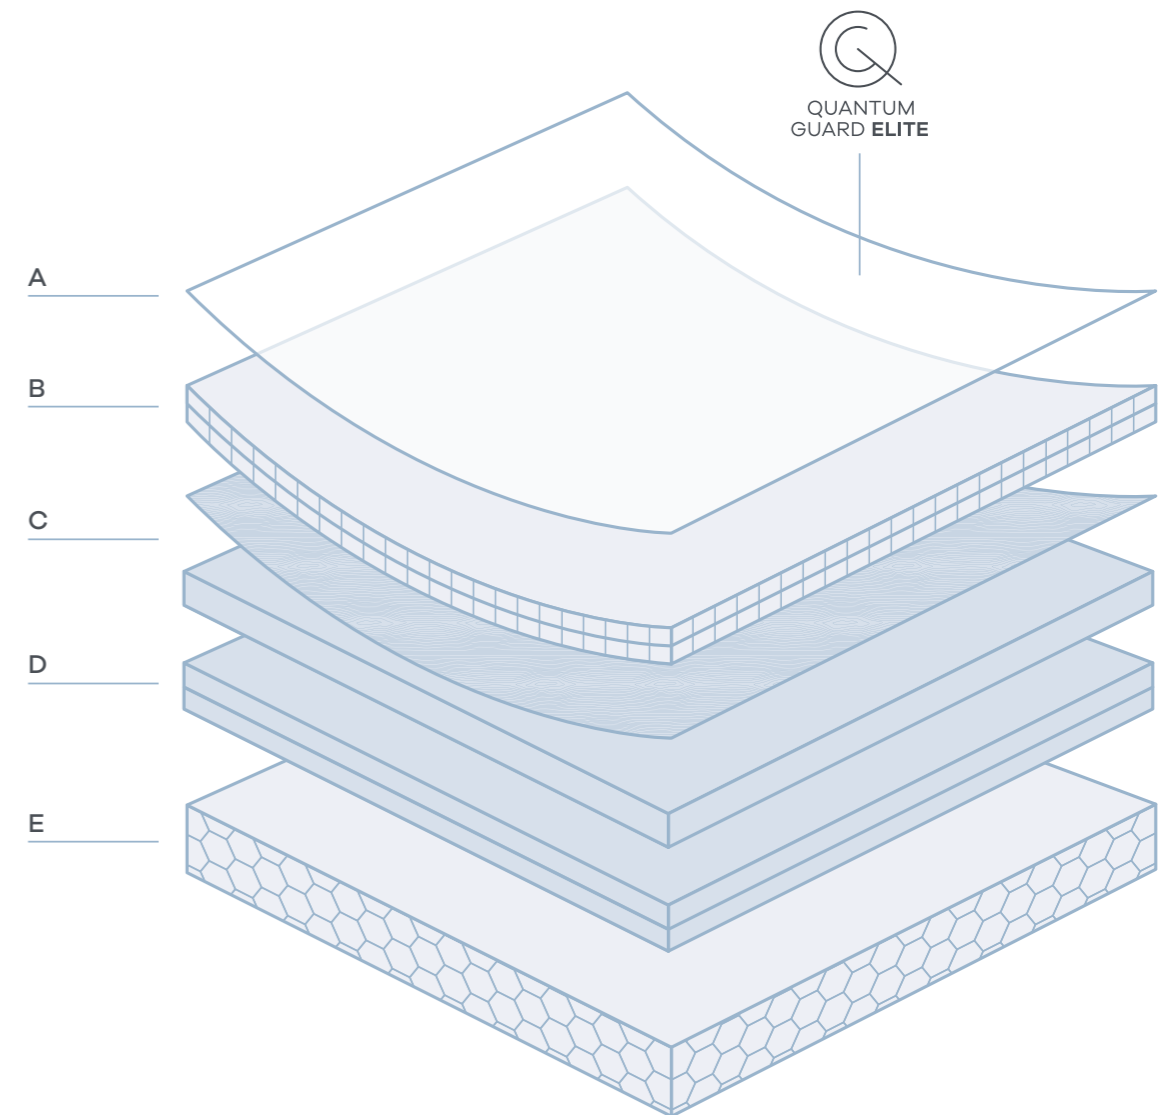

Carefully crafted print layers create the rich detailed designs unique to the Signature collection.

D. Backing layer

The foundation of the product which provides long-lasting stability. Contains up to 30% recycled pre-consumer content.

E. Acoustic backing layer (optional)

A 1 mm layer that provides impact sound reduction of up to 18 dB.

Installation

The Signature Collection has been designed for straightforward installation. Make your Signature statement by following these floor preparation and installation guidelines.

Intended Use

- Amtico Signature products are recommended for use over properly prepared concrete, suspended wood, metal and other suitable substrates.
- Do not install Amtico Signature products until the subfloor is prepared and the work of all other trades is complete.
- Amtico Signature products can be used with radiant under-floor heating systems, but note that the surface temperature of the subfloor must not exceed 27°C (81°F).
- Amtico Signature products are not intended for outside use.

Material Receiving, Handling & Storage

- Ensure materials delivered are the correct style, colour, shade and quantity; check tiles for visual defects.
- Report discrepancies immediately.

Jobsite Testing & Subfloor Preparation

- The building must be sealed with stable environmental conditions.
- Subfloor must be clean (free of dirt, old adhesives, paint, grease, wax or other contaminants that may stain or prevent adhesion), smooth, flat, sound, fit for purpose and free of movement and excess moisture.
- Test concrete for moisture content (country specific) or relative humidity in accordance with national regulations.
- Readings above the maximum permitted require the use of a surface damp proof membrane or adequate time for the floor to dry to an acceptable standard. Record test results and corrective action(s). Documentation is required for processing claims.
- Bring the subfloor to an acceptable condition using appropriate smoothing and levelling compounds. For wood subfloors use approved underlayment panels. Install surface preparation materials according to the manufacturers' instructions and ensure a smooth surface to prevent any irregularities or roughness from telegraphing through the new flooring.

Installation Procedures

- Inspect each tile for visual defects before installing.
- Installation of flooring implies acceptance of materials.
- Acclimatise Amtico Signature products, adhesive and subfloor to a stable condition between 18°C-27°C (64°F-81°F) for a minimum of 24 hours before, during and after installation. For best results and in particular when extreme temperature conditions exist, increase the acclimatisation to a minimum of 48 hours.
- Apply recommended Amtico adhesive according to label instructions. Adhesive selection should be appropriate to site conditions – see adhesive labels for more detailed information. Amtico will not be held responsible for any installation complaints if a non-recommended adhesive is used.
- The floor must be rolled using a 45 kg three-section roller in both directions.
- The finished floor should be protected from point loads and heavy traffic for 24 hours after installation and should not be washed for 48 hours.

Routine Maintenance

- Daily sweep or dust mop the floor and clean up all spills immediately.
- Perform damp mopping or machine cleaning (<450 rpm) as necessary. For routine everyday cleaning, use Amtico Maintainer or equivalent.
- When machine cleaning, use a 3M red pad or equivalent.
- Avoid cleaners that contain abrasives or solvents that may permanently damage the floor.

Periodic Maintenance

- Use stripper to remove ground in-dirt and old or worn coats of dressing.
- Dressings can be applied if desired or as necessary. Follow the instructions for proper usage and application.

Caution

When kept clean and dry, Amtico Signature products have excellent slip-resistant properties. However, in common with other smooth floor coverings, water, other liquids, grease and other contaminants on the surface of the floor can make them slippery.

For further technical information please visit amtico.com/commercial/technical

Adhesives

Amtico SF Adhesive

An EC1 Plus-certified, water-based acrylic adhesive with a working time of up to one hour, recommended for use in all areas except those subject to heat and moisture. 2.5, 5 and 15 litres

Amtico PS Adhesive

PS Adhesive is an EC1 Plus-certified water-based acrylic adhesive that has an extended working time of up to three hours and is recommended for all areas except those subject to heat or moisture. 3, 6 and 14kg

Amtico HT Adhesive

HT Adhesive is a single-part, wet-set, water-based acrylic adhesive that has very good temperature resistance. It has a working time of up to 30 minutes and is classified as EC1 Plus. It is recommended for areas subject to some heat variations, such as conservatories and areas receiving direct sunlight. It is also suitable for use where underfloor heating has been installed. 5 and 15 litres

Amtico HT Extra Adhesive

An EC1 Plus-certified single-part, water-based acrylic adhesive that has very good temperature resistance and improved grab, with a working time of up to 20 minutes. Recommended for areas subject to some heat variations, such as conservatories and adjacent to sunny windows. It is also suitable for use where underfloor heating has been fitted. 6 and 14kg

Wear and Care Advice

Product Care

- Avoid using aerosol sprays and other silicone-based products as overspray can leave a residue and make the floor slippery.
- Use entrance matting at all external doorways. This will help reduce the chance of water, excess grit, dirt, small stones and other debris being walked onto the floor. Some rubber-backed matting can cause permanent staining.
- Spillages should be wiped up immediately. Residues of oils and greases are potential slip hazards; the affected area should be cleaned thoroughly with a neutral cleaner.
- Avoid contact with rubber, asphalt, some paints and shoe polishes, which can potentially stain the floor.
- Do not allow cigarettes, matches or other hot items to be deposited on the floor as permanent damage is likely to occur.
- Do not use steam mops as these may damage the tiles or cause adhesives to fail.

Amtico Universal 2-Part Adhesive

Universal 2-Part Adhesive is a wet-set adhesive that can be used for bonding Amtico Design Tile products in wet areas such as bathrooms.

It may also be used for high-temperature areas. Universal 2-Part has a working time of 40-60 minutes, is entirely solvent free and classified as EC1 Plus with respect to very low VOC emissions. 6kg

Use of Amtico Adhesives

Follow the instructions on the labelling, paying particular attention to the pot life and working times. Spread adhesives evenly using an A2 trowel. Do not use worn trowels. Only spread sufficient adhesive that can be covered within the recommended open time. The tiles should be rolled with a 45kg roller as soon as possible after installing and before the adhesive sets; timing will depend on site conditions and adhesive selection. Always clean away excess adhesive before it is allowed to dry; use a soft cloth moistened with adhesive remover.

- Amtico products have good scratch-resistance properties. However sharp edges on some items of furniture can damage your floor. Care should also be taken when using vacuum cleaners, as they may scratch the floor.
- The use of furniture cups, felt pads or glides are essential to help reduce the risk of your floor being scratched.
- Do not drag heavy items of furniture across the floor as this will result in serious scratch marks. Care should be taken with a new floor when furniture and other appliances are being fitted or placed back into the space.
- Castors, furniture cups and other means of load spreading will help reduce the risk of indentation to the floor when used under heavy load-bearing furniture and appliances.

Accreditations

Our ethos is to combine creativity and innovation with the highest levels of quality – design, manufacturing, product and service.

	<p>Amtico Signature has been certified to achieve the M1 building materials emissions classification for indoor air quality from the Finnish Information Foundation RTS.</p>		<p>Amtico Signature products have been UPEC classified, therefore conforming to local French legislation.</p>
	<p>Amtico is a member of the professional association for flexible floor covering manufacturers in Germany.</p>		<p>The CE mark is a confirmation by Amtico that our products are in compliance with European health, safety and environmental requirements (as required by Council Directive 89/106/EEC and detailed in EN 14041).</p>
	<p>Our quality system complies with BS EN ISO 9001 and is certified by LRQA.</p>		<p>Amtico International GmbH is a member of the DGNB German Sustainable Building Council.</p>
	<p>Amtico Signature products are third-party certified for low-VOC emissions contributing towards good indoor air quality.</p>		<p>Amtico products comply with BSI ISO 14001 environmental standards.</p>
	<p>Amtico Signature products are manufactured using both phthalate-free and bio-based plasticisers except for recycled content.</p>		<p>SOL PVC Pro is the French professional organisation of PVC flooring manufacturers; standing for their shared values and commitments related to environment, comfort, regulation and communication.</p>
	<p>Amtico Signature complies with Indoor Air Comfort Gold version 6.0 and is certified as a low-emissions product contributing to a healthy indoor environment.</p>		<p>Amtico International partenaire de Sols Pvc^{PRO}</p>

Visit amtico.com for more information on our product range, inspiring ideas, maintenance and installation advice. Every effort is made to achieve accurate reproduction of products in this brochure, however printing limitations can be misleading. Selection of products should be made from actual samples. Samples are small pieces cut from standard tiles. They give only a general indication of the design. Tone and shading can vary slightly from batch to batch and it is not possible to guarantee that the sample will exactly match the material supplied. The policy of the Company is one of continuous development and improvement and the right is reserved to add or delete from the range or change patterns without prior notification. All metric sizes are rounded. All products are manufactured in line with EN ISO 10582 and EN1307. Brochure correct at the time of printing.
